

Amity Prudent Fund of Funds

December 2011

PORTFOLIO OBJECTIVE

The primary investment objective of the portfolio is to provide the investor with a moderate level of capital growth over the medium to long term.

INVESTMENT STRATEGY

Investments to be included in the Amity Prudent Fund of Funds will, apart from assets in liquid form, consist solely of participatory interests and other forms of participation of local and global collective investment schemes, or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and trustee of a sufficient standard to provide investor protection at least equivalent to that in South Africa and which is consistent with the portfolio's primary objective, investing in equity securities, property securities, non-equity securities, preference shares, bonds, money market instruments and assets in liquid form. The portfolio's equity exposure will range between 40% and 65% of its net asset value and the composition of the portfolio shall reflect the investment structure of a retirement fund with a moderate risk profile.

COMMENTARY

Further intensification of the European debt crisis in the latter half of 2011 resulted in an increasingly opaque global macro economic outlook and rising levels of negative investor sentiment. This was much to the benefit of fixed interest asset classes, which saw the local bond market returning 3.45% in the final quarter of the year and 8.80% for the year. With local inflation ending the year at a rate of 6%, this translates into a real return of close on 3% from this asset class, far exceeding the negative real return of 3% delivered by the local equity market.

Globally, the same trend was repeated with safe haven assets as represented by developed market government bonds returning 7% in USD terms, while equities as shown by the MSCI World Equity Index lost 5%.

Despite posting rather relative muted returns compared to 2010, the local property market was the top performing asset class with a nominal return of 8.93% for the year and 3.73% in the final quarter of the year. On a forward looking basis, healthy contractual escalations from this asset class, coupled with projected rental distributions within the region of 5% to 7% will be sufficient to support a forward yield of 8%. This is an attractive real return opportunity relative to cash. Cash as measured by the SteFI composite index returned 5.73% for the year. Should inflation sustain its current uptrend, Cash as an asset class is set to remain un-attractive from a real return point of view.

Local investors with some offshore exposure would have benefitted from the significant weakening of the rand over the year. The rand weakened by 21.90% against the US dollar and by 18.34% against the Euro over the year. At current levels, the rand is trading within its fair valuation levels, but given how highly volatile it is, it remains difficult to form realistic expectations regarding its outlook.

Collective Investments are generally medium to long term investments. The value of participating interests may go down as well as up and past performance is not necessarily a guide to the future. Collective Investments are traded at ruling prices and can engage in scrip lending. Forward pricing is used. A schedule of fees and charges and maximum commissions is available on request from company/scheme. Commission and incentives may be paid and if so, are included in the overall cost. This fund may be closed to new investors. A fund of funds collective investments may invest in other collective investments, which levy their own charges, which could result in a higher fee structure for these portfolios. Graphs and performance figures are sourced from MoneyMate for lump sum investments including income distribution, at NAV to NAV basis and does not take any initial fees into account. Income is reinvested on the ex-dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Collective Investment prices are calculated on a net asset value basis and auditor's fees, bank charges and trustee fees are levied against the portfolio. The portfolio manager may borrow up to 10% of portfolio NAV to bridge insufficient liquidity. The performance fee FAQ document is kept as a public document at Metropolitan Head office. Metropolitan Collective Investments Ltd is a Full member of the Association of Savings & Investments SA (ASISA).

Portfolio ongoing fees

Class A

- Portfolio ongoing fee	1.00%
- Underlying portfolios net of rebates	1.21%
- Performance fees	0.00%
	2.21%
- VAT	0.31%
Total TER	2.52%

Please note: the TER has been calculated using data from 1 October 2010 until 30 September 2011. The TER is disclosed as % of the average Net Asset Value of the portfolio that were incurred as charges, levies and fees related to the management of the portfolio and underlying portfolios. The TER is adjusted for significant subsequent portfolio restructurings and/or fee changes.

A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER can not be regarded as an indication of future TER's.

Terms and Conditions

Term of investment:

The suggested *minimum term* of investment in this fund is 5 years. However, it must be recorded that the fund aims to achieve consistent superior returns over a term of 5 years and longer.

Terms, conditions and exclusions:

- Investments in unit trusts are generally long term investments and historic performance should never be seen as a guarantee of future performance.
- The investment return from this portfolio cannot be compared to other, more conservative investment portfolios, e.g. money in the bank or guaranteed investments.
- The investment capital is not guaranteed over the investment term and the value of the investment may go up and down depending on market conditions.
- This fund is managed with the specific aim of limiting the downside over any 12 months to a maximum drawdown in the portfolio of -10%.
